

Technical services and distribution centres

Canada Vancouver

98 acre facility. 85,900 sq. ft. building. Full-service vehicle processing facility serving more than a dozen different manufacturers. Two (2) deep water riverside berths. Terminal operates as both a reload center and as a secured, sufferance bonded compound offering a full range of services. This is the only port facility served by Southern Railway of British Columbia whose rail connections to CN, CP and BNSF provide customers with rail choices to all of Canada and the United.
